## Task for Mahtab's Story

## Metaphor Game: What is the same?

In a moment, you will receive one noun. Working with your partner, you will need to find as many similarities as possible between these two random things. The goal is to come up with as many similarities as possible in the time given. Let's do one together to practise:

## STEP 1 (practice)

| Noun \#1: Bug | Noun \#2: Computer |
| :--- | :--- |

## STEP 2 (with a partner)

Now it is your turn to work with your partner. Prizes will be awarded for the team that creates the MOST similarities and the MOST CREATIVE similarity.

| Noun \#1: | Noun \#2: |
| :--- | :--- |

## REFLECTION

In the space below, I want you to write a short reflection on why we opened our English class with this exercise. Consider these questions:

- How is this game like English class?
- What did you learn from playing this game?
- What connections can you make between this game and school in general?
